

SECURITY FOR STARTUPS SOLUTION

GROW CONFIDENTLY, WE'VE GOT YOUR SECURITY COVERED

Startups often overlook cybersecurity due to tight budgets and fast growth, making them prime targets for cybercriminals. Ignoring security can lead to costly breaches, lost trust, and downtime. Ebryx's Security for Startups solution tackles these challenges head-on, providing tailored protection without slowing your growth. Focus on building your business while we keep it secure.

COVERING BOTH ESSENTIAL AND ADVANCED SECURITY NEEDS

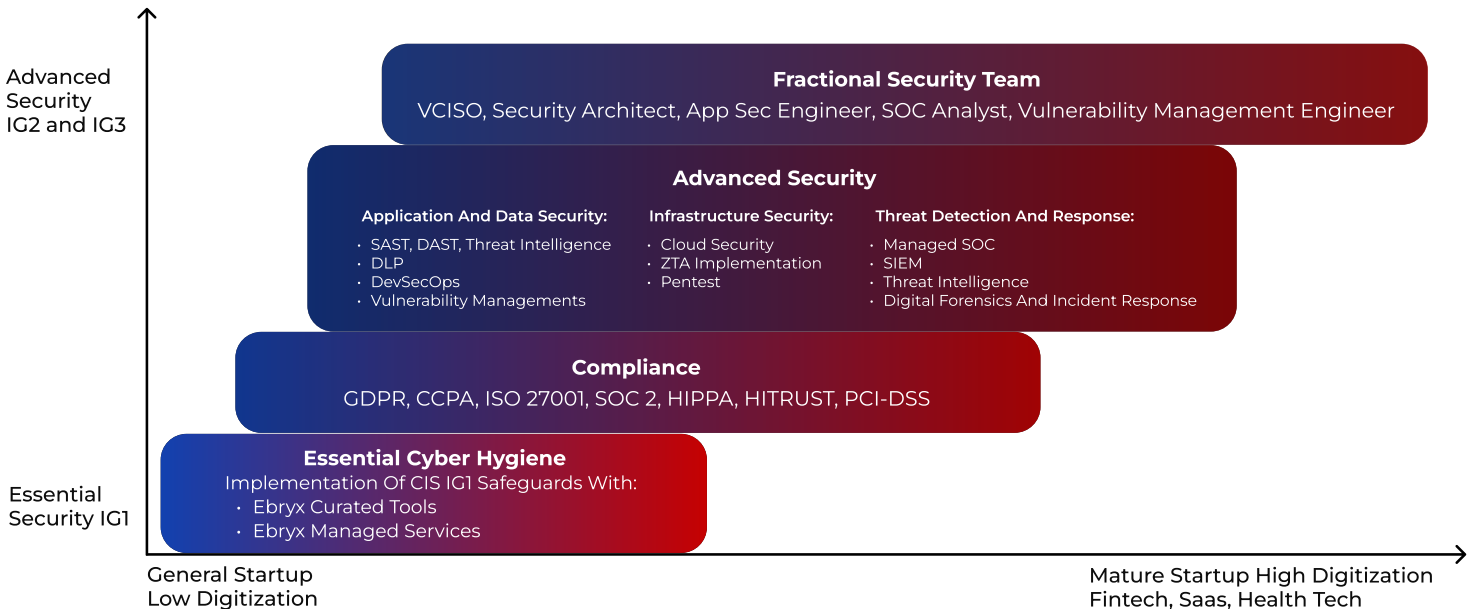

Get a trusted solution built on Center of Internet Security's controls, known for their operational and prescriptive approach to cybersecurity. Developed by a community of experts, these controls use data-driven analysis to address common attack types. Begin with IG1 for essential cyber hygiene and scale up to IG2 and IG3 as your security needs grow, ensuring comprehensive protection.

- Comprehensive security that encompasses prevention, detection, response, and recovery
- Implementation of advanced CIS security safeguards (IG2 and IG3) and the adoption of a Zero Trust architecture.
- Includes advanced areas like application security, data security, infrastructure security, threat detection and response, compliance and a fractional security team.
- Get the basics right by focusing on the minimal yet most impactful security controls
- Ebryx curated tools and managed services
- Build a solid security foundation
- Implement 56 CIS IG1 Safeguards

MEETING YOU WHERE YOU ARE AND TAKING YOU WHERE YOU NEED TO BE

As your startup grows, our cybersecurity solution evolves with you, offering tailored protection at every stage. Start with Essential Cyber Hygiene and build toward compliance and advanced security. Access a fractional security team, from vCISO to security architect, choosing services that match your startup's maturity. Experience flexibility in meeting your specific cybersecurity needs and goals.
